

Figure 1-View of Gunnison Island from causeway

Figure 2-View of south arm from causeway, showing use by gulls

Figure 3-Closeup of view of north arm from causeway, Gunnison Island in distance, gulls floating on interface of north/south arm water interface

Figure 4- View of Gunnison from existing east dike. Island is about seven miles from photo point.

Figure 5-View of Gunnison from existing east dike. Water begins about 1 mile from observation point. Note vegetation on dike spoils.

Figure 6- View of evaporative pond looking southwest- dike and causeway in distance unobservable because of curvature of earth

Figure 7-View of Dolphin Island from north dike. No vegetation past the dike spoils.

Figure 8- Blue heron in flight -view of north dike - evaporation pond on left, intake canal on right

Figure 9-Closeup of wading birds in evaporation pond

Figure 10- View of falcon on evaporative pond perch

Gunnison Island, popular pelican nesting ground.
